Skills: Digital Marketing · Inbound Marketing ·
Social Media Marketing · Graphic Design

PROJECTS

Reward -Your - Teacher - Application

The Reward-Your-Teacher product seeks to serve as a link between exceptional teachers and their students.

It allows the students to reach out to teachers, and send money freely to these teachers in appreciation for their excellent and exemplary work.

It is a Microservice application that contains 3 services.

Namely: User Management Service, Notification Service, and Wallet Service.

Technologies Used: C#, Asp.NET Web API, Entity Framework Core, PostgreSQL, SignalR, JWT Authentication, and Authorization, Pay Stack, Heroku, Git, and GitHub.

Link: Internal

To-Do List

A web application that models a To-do App using ASP. NET Core MVC, saving members' details in an SQL Server database, and implementing multithreading for heavy-duty operations in the application.

Technologies Used: EF Core, Bootstrap, ASP.NET Core MVC, SQL, and NUnit.

Link: <https://github.com/Hope-22/To-Do-Application>

Portfolio

A portfolio that shows the collection of projects, skills, and experiences. It features a login/ sign-up section where one as an admin can have access to the dashboard in order to add, delete and update the accomplishments.

Technologies Used - Bootstrap, C#, ASP.NET Core MVC, Entity Framework Core, Identity, SQL Server, GitHub.

Link: <http://github.com/Hope-22/Portfolio>

Task Management System

ASP.NET Core API that performs CRUD operations in an SQL Server database.

CRUD stands for Create, Read, Update and Delete.

Used REST patterns while building the .NET API.

Technologies Used - ASP.NET Core Web API, Entity Framework Core, SQL Server, Swagger, and GitHub.
